

STAINLESS SHELL CONVEYOR WITH COLLECTING TANK FOR INEDIBLE PRODUCT

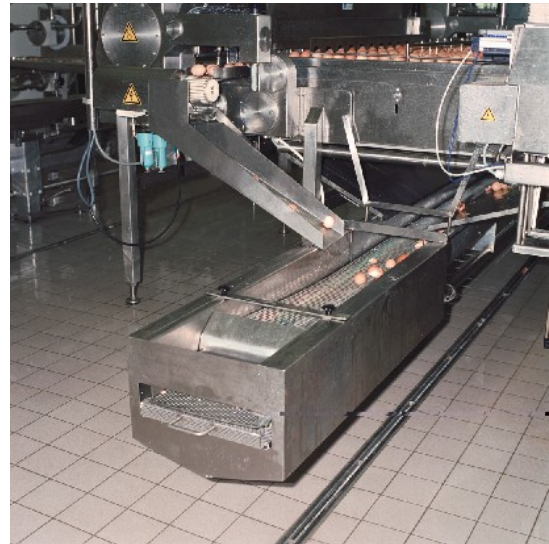

After breaking, egg shells can be transported to the centrifuge. This can be done by the Coenraadts Shell Conveyor.

They are 2 models:

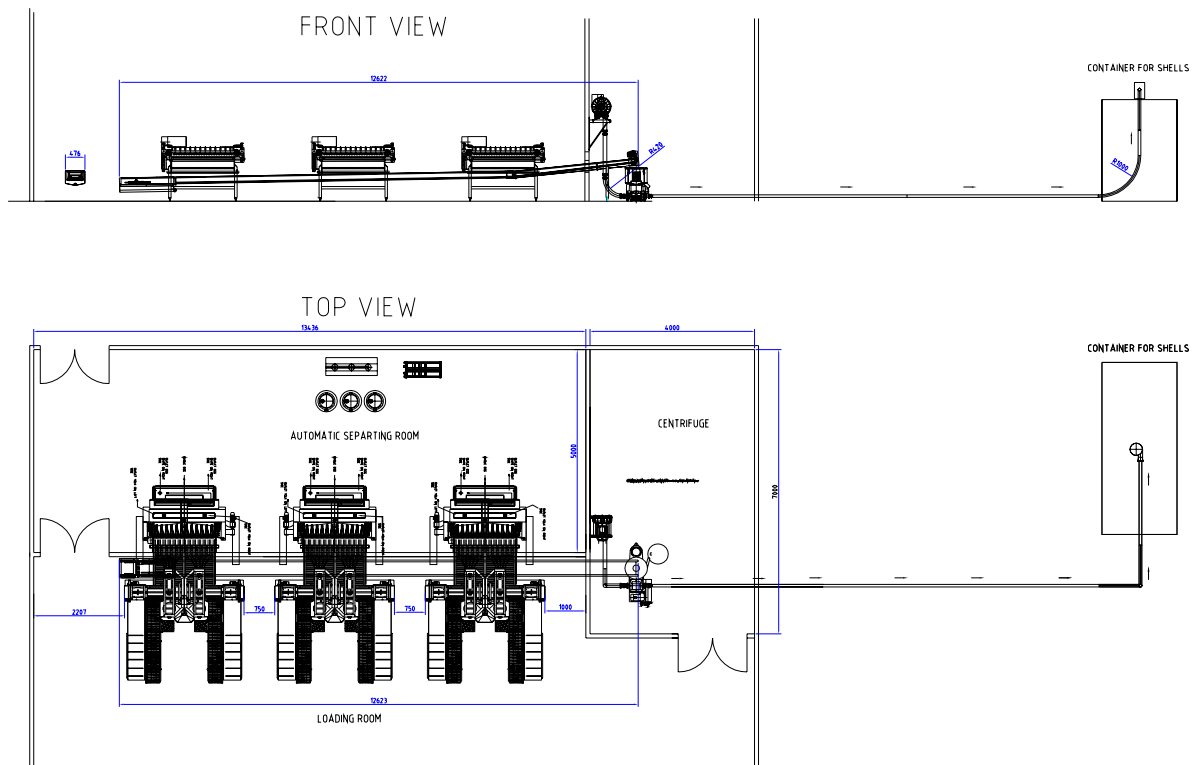

- CBG-300: 300mm large
- CBG-600: 600mm large (for big eggshell capacities)

All models can be foreseen with a frequency-controller (optional)

The length of the shell conveyor depend on the position of the centrifuge compared to the egg breaking machines

COLLECTING TANK FOR INEDIBLE PRODUCT

TYPE: CBG 300

Electricity: *1ph.230V+PE 0,75 kW*

Air consumption: *low consumption @ 3 bar*

TYPE: CBG 600

Electricity: *1ph.230V+PE 0,75 kW*

Air consumption: *low consumption @ 3 bar*
